**Gornitzky represents Y.T.Y. Lenny Investments Ltd in a venture capital investment in Guardian Optical Technologies Ltd. which is developing an advanced 3D sensor for vehicles in order to improve driving experience and safety**

News

**Gornitzky represented Y.T.Y Lenny Investments Ltd. in a venture capital investment in Guardian Optical Technologies Ltd. Guardian Optical Technologies is an innovative Israeli startup developing an advanced 3D sensor that makes cars safer and enables them to distinguish between still objects and human beings thanks to the presence of a beating heart.**

This sensor will prevent drivers from forgetting infants in the car as well as serve as a sensor for seat belts, the airbag system, monitoring driving, movement recognition, driver recognition, black boxes and many other applications. This 3D sensor is expected to prevent car accidents and save lives.

Y.T.Y Lenny Investments Ltd. and its affiliates were represented by Timor Belan (Partner) and Avi Meer.
